

HOW TO PREPARE FOR PEOPLE WITH MEDICAL NEEDS.

In a disaster, people with special medical needs have extra concerns.

MEDICATIONS.

- Always have at least a three-day supply of all your medications.
- Store your medications in one location in their original containers.
- Have a list of all of your medications: name of medication, dose, frequency, and the name of the prescribing doctor.

MEDICAL SUPPLIES.

- Have an extra three-day supply of any medical supplies you use, such as bandages, ostomy bags, or syringes.

ELECTRICALLY POWERED MEDICAL EQUIPMENT.

- For all medical equipment requiring electrical power—beds, breathing equipment, or infusion pumps—check with your medical supply company and get information regarding a back-up power source, such as a battery or generator.

OXYGEN AND BREATHING EQUIPMENT.

- If you use oxygen, have an emergency supply (enough for at least a three-day period).
- Oxygen tanks should be securely braced so they do not fall over. Call your medical supply company regarding bracing instructions.
- If you use breathing equipment, have a three-day supply or more of tubing, solutions, medications, etc.

EMERGENCY BAG.

In the event that you have to leave your home, have a bag packed at all times that contains:

- A medication list.
- Medical supplies for at least three days.
- Copies of vital medical papers such as insurance cards, power of attorney, etc.

PEOPLE WHO CAN HELP.

- An important part of being prepared for a disaster is planning with family, friends and neighbors. Know who could walk to your home to assist you with other means of transportation
- Discuss your disaster plans with your home health care provider.
- Ask your local fire department if they keep a list of people with special medical needs; ask to be included if they do maintain a list.
- Keep a list handy of people who can help and their phone numbers.
