When disaster strikes, your immediate concern will be your safety and the safety of those you care about. Once the immediate danger passes having your financial and medical records and important contact information will be crucial to help you start the recovery process quickly. Taking time now to safeguard these critical documents will give you peace of mind, ensure you have access to essential medical and prescription information, and help you avoid additional stress during the difficult days following a disaster. In addition, take the time now to think about the priceless personal items you would want to protect from damage or take with you if you had to suddenly evacuate your home.

The first step is to take an inventory of your household documents, contacts, and valuables. The checklist below will get you started. PROTECT YOUR DOCUMENTS AND VALUABLES.

Once you have gathered your financial, legal, and contact information, it is essential to safeguard this information.

- Consider storing paper copies of important documents at home in a fireproof and waterproof box or safe, in a bank safe deposit box, or with a trusted friend or relative. If you are using a safe deposit box, you may want to ask your bank or check State laws to confirm who can and cannot access the safe deposit box if the lessee dies or is incapacitated.
- Store electronic copies of important documents in a password-protected format on a removable flash or external hard drive in your fireproof and waterproof box or safe, or consider using a secure cloud-based service. (Visit www.us-cert.gov/ncas/tips/st04-019 to learn how to use electronic encryption to protect sensitive information.)
- Think about where you store valuable belongings and ways to better protect these items. If you have valuable items stored in a basement, you may want to move them to a higher location and put them in waterproof containers to avoid water damage. Or you may want to keep small items in a flood/fireproof home safe. You may also want to secure items that are displayed on shelves or walls if your home may be subject to high winds or earthquakes.
